DPO

```
graph TD; A["python shaped (rejected)"] -.-> D["DPO"]; B["idiomatic (chosen)"] --> D;
```

The diagram illustrates the DPO (Direct Preference Optimization) process. It features three boxes: a light gray box at the top left labeled 'python shaped (rejected)', a light gray box at the top right labeled 'idiomatic (chosen)', and a white box with a thick black border at the bottom center labeled 'DPO'. A dashed gray arrow points from the 'python shaped (rejected)' box to the 'DPO' box, while a solid black arrow points from the 'idiomatic (chosen)' box to the 'DPO' box.
